

# TRANSFORMING STUDENT HEALTH CARE AT THE OHIO STATE UNIVERSITY

---

*For 100 years, Ohio State has been a national leader in providing innovative and extraordinary healthcare to college students.  
**Join us in continuing this strong tradition.***

**THE OHIO STATE UNIVERSITY**

OFFICE OF STUDENT LIFE

# *Impact on* **STUDENT WELLNESS**

A student's health can directly help, or hinder, academic success. That is why Ohio State's Office of Student Life is committed to providing the support and services that students need to do their very best.

**THE JOHN W. WILCE STUDENT HEALTH CENTER**, centrally located in the heart of campus, is home to Student Life's Student Health Services. Student Health Services, a nationally accredited outpatient facility, provides comprehensive health care services to the student population of The Ohio State University.

Originally opened in December of 1969, the health center has recently undergone a **\$7.3 million** renovation that expanded the facility by approximately **8,000 square feet**, allowing us to improve the student experience and enhance clinical services.

### ***The project includes:***

- 8 new exam rooms
- New procedure room
- Comfortable patient registration/reception area
- New, larger pharmacy
- New, convenient entrance

The expansion of the health center provides a unique opportunity to develop a terrace roof onto the addition. Student Health Services envisions a Wellness Terrace overlooking the greenspace located directly south of the building. This area, often referred to as the Wellness Corridor, is bordered by: Thompson Library, Psychology Building, Cunz Hall, home to the College of Public Health, Student Life's Recreational and Physical Activity Center (RPAC), John W. Wilce Student Health Center.

The Wellness Terrace will offer a beautiful and relaxing outdoor waiting and study area for students utilizing the health center or just passing by. The terrace is envisioned to feature green roof technology and include a paver patio, benches, tables, chairs and greenery.

We hope you will join us in creating another extraordinary space for our students as they stay well and succeed, now and in the future.
