### PHARMACY VACCINE MENU

**Flu** *14 years and older*

**Meningococcus (Menveo)** *18 years and older*

**Pneumonia (Pneumovax 23)**

**Tetanus, Diptheria (Td)**

**Tetanus, Diptheria, Pertussis (Tdap)**

**Note:** In deciding whether Td or Tdap is the appropriate choice, it is recommended that adults be given Tdap once in place of the routine (every ten year) dose of Td. Future boosters after Tdap should be given with Td only.
